For those of you who would like to attend the seminar on the impacts of metals and metallic mining that TNC is hosting with the UAA Department of Health Science and the USF&WS. I have prepared a registration form that I would appreciate getting back from you so that we can keep track of attendees and prepare enough materials. It would be helpful if you could return a registration by November 22.

The first two days of the seminar will be presented by Dr. Solomon and will focus on the impacts to aquatic ecosystems. The third day will be a co-presentation of Dr. Solomon and Dr. Hodges-Snyder on the impacts to human health. The third day will be a discussion about specific impacts of several metals on human health, on Alaska-specific risk and health impact assessments, fate and transport of metals in Arctic environments, and source control and remediation of metal-contaminated sites.
